

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for wireless transmission of information from a first media to a second media, comprising the steps of:

entering said the information on said the first media, wherein said the first media comprises includes paper media, wherein said information is entered via a Bluetooth-enabled pen; and

transferring said the information from said the first media to said the second media, wherein said step of transferring couples said Bluetooth-enabled pen directly to a computer and via said computer to an online service provider, wherein said the second media comprises includes online electronic media and is an online duplicate of said the first media.

2. (Currently Amended) The method of Claim 1, wherein said the information is entered and transferred via a Bluetooth-enabled pen further comprises:

a receiver device; and

a transmitter device.

3. (Currently Amended) A method for wireless transmission of information from a first media to a second media, comprising the steps of:

entering said the information on the said first media; and

transferring said the information from said the first media to said the second media via an ad-hoc network, wherein the second media is an online duplicate of the first media.

4. (Currently Amended) The method of Claim 3, wherein said the first media comprises includes paper media and the second media comprises includes electronic media.
5. (Cancelled)
6. (Currently Amended) The method of Claim 4, wherein said the first media comprises: includes
a paper book.
7. (Currently Amended) The method of Claim 4, wherein said the first media comprises: includes
a paper magazine.
8. (Currently Amended) The method of Claim 4, wherein said the first media includes comprises:
a paper shopping catalog.
9. (Currently Amended) The method of Claim 3, wherein said the ad-hoc network comprises: is
a Bluetooth network.
10. (Currently Amended) The method of Claim 3, wherein the said step of transferring the information includes further comprises the step of:
overlaying said the information on said the second media.

11. (Currently Amended) The method of Claim 10, wherein said step of the entering the information includes further comprises the step of:

circling a portion of said ~~the~~ first media.

12. (Currently Amended) The method of Claim 10, wherein said step of the entering the information includes further comprises the step of:

underlining a portion of said ~~the~~ first media.

13. (Currently Amended) The method of Claim 10, wherein said step of the entering the information includes further comprises the step of:

highlighting a portion of said ~~the~~ first media.

14. (Currently Amended) The method of Claim 10, wherein said step of the entering the information includes further comprises the step of:

writing a note on said ~~the~~ first media.

15. (Currently Amended) The method of Claim 10, wherein said step of the entering the information includes further comprises the step of:

selecting a word.

16. (Currently Amended) The method of Claim 15, further comprising including the step of:

providing a dictionary meaning for said ~~the selected~~ word on said ~~the~~ second media.

17. (Currently Amended) The method of Claim 10, wherein said step of the entering the information further comprises the step of: includes

filling up a form.

18. (Currently Amended) The method of Claim 17, wherein said the form includes comprises:

a tax form.

19. (Currently Amended) The method of Claim 17, wherein said the form comprises: includes

a purchase order.

20. (Currently Amended) The method of Claim 4, wherein said the electronic media includes comprises:

Internet-based media.

21. (Currently Amended) An apparatus for online transmission of information from a first media to a second media, including comprising:

a marking device configured to enter said the information on said the first media; and

a transmitter configured to transmit said the information entered on said the first media to said the second media, said the transmitter being connected to said the marking device, said transmitter transmitting directly to a computer connected to a Web server, and said the second media being an electronic duplicate of said the first media.

22. (Currently Amended) The apparatus of Claim 21, wherein said the marking device comprises: includes

a pen.

23. (Currently Amended) The apparatus of Claim 21, wherein said the first media includes comprises a paper media and said the second media includes comprises an electronic media.

24. (Cancelled)

25. (Currently Amended) The apparatus of Claim 23, wherein said the first media includes comprises:

a paper book.

26. (Currently Amended) The apparatus of Claim 23, wherein said the first media includes comprises:

a paper magazine.

27. (Currently Amended) The apparatus of Claim 23, wherein said the same first media includes comprises:

a paper shopping catalog.

28. (Currently Amended) The apparatus of Claim 21, wherein said the transmitter includes comprises:

a Bluetooth-enabled device.

29. (New) The method of Claim 3, wherein said step of transferring does not transfer said information via a netpage printer to a phone.
30. (New) The method of Claim 3, wherein said information is entered and transferred via a pen having a tip, said pen having a transmitter device.
31. (New) The method of Claim 30, wherein said first media comprises:
a radio-frequency tag.
32. (New) The method of Claim 31, where said radio-frequency tag is activated when said pen is in close proximity to said first media.
33. (New) The method of Claim 30, further comprising the step of:
capturing digitally any of:
a motion of said pen;
video of an area above said tip of said pen; and
a page number of said first media.
34. (New) The method of Claim 33, wherein said area comprises an area about half an inch above said pen.
35. (New) The method of Claim 31, wherein said pen is Bluetooth enabled.
36. (New) The method of Claim 35, wherein said step of transferring couples said Bluetooth-enabled pen to an online service provider via a computer.

37. (New) The method of Claim 9, further comprises the step of:
using a Bluetooth enabled pen in said step of entering, wherein said
information is entered via said Bluetooth enable pen; and
using said Bluetooth enabled pen in said step of transferring, wherein said
step of transferring couples said Bluetooth-enabled pen to an online service
provider via a computer.
38. (New) The apparatus of Claim 21, wherein said first media does not
consist of a netpage form.
39. (New) The apparatus of Claim 21, wherein said first media further
comprises:
a radio-frequency tag.
40. (New) The apparatus of Claim 22, wherein said marking device further
comprises:
a transmitter device; and
a receiving device.
41. (New) The apparatus of Claim 40, further comprising:
a digital image capture device.
42. (New) The apparatus of Claim 40, further comprising:
means for ad-hoc connection to a Web server.
